PROFESSIONAL SUMMARY

Data Engineer and Full-Stack Developer with hands-on experience building data pipelines using Databricks, PySpark, dbt, and Delta Lake. Worked on an end-to-end SKU matching pipeline involving data processing, entity matching, and data quality checks. Experienced in building web applications and APIs using Python, Django, SQL, and JavaScript.

EDUCATION

Master of Computer Applications (MCA) <i>Bangalore University (T. John College)</i>	2024 – 2026 Karnataka, India
Bachelor of Science in Computer Science (BSc) – First Class with Distinction <i>Bharathiar University</i>	2021 – 2024 Tamil Nadu, India
DUT in Computer Engineering (Génie Informatique) <i>Institut Universitaire de Technologie, Université des Comores</i>	2019 – 2021 Moroni, Comoros
Baccalauréat, Série D <i>Ministry of National Education</i>	2019 Moroni, Comoros

EXPERIENCE

Data Engineering Intern <i>Goavega Software Pvt. Ltd.</i>	Jun 2026 – Sep 2026 Bengaluru, India
- Built an end-to-end SKU matching data pipeline on Databricks using a medallion architecture: Bronze ingestion, Silver cleansing, a mapping and GTIN resolution stage, and a curated Gold layer consumed by a dashboard. - Implemented entity matching and resolution logic to reconcile product records across multiple source systems with inconsistent identifiers and naming. - Developed SQL, dbt and PySpark transformations for cleansing, deduplication and standardisation, with automated data quality validation using Great Expectations and Data Docs reporting. - Used Delta Live Tables and Auto Loader for declarative, incremental file ingestion with Unity Catalog governance; built a FastAPI service layer and a Databricks App (Dash) for internal data review.	

PROJECTS

Smart Faculty Attendance & SMS Notification System <i>Django, DRF, PostgreSQL, Twilio</i>	
- Built a Django 5.2 and PostgreSQL system integrating a ZKTeco K40 Pro biometric device over TCP/IP using the pyzk SDK, polling the device on a schedule with APScheduler. - Designed a DRF REST API exposing dashboard statistics, device status, recent attendance and sync endpoints.	
Django CRM Web Application <i>Python, Django, MySQL, Bootstrap</i>	github.com/mdahoma400/django-crm
Full-stack CRM with role-based authentication, session management and full CRUD for customer records.	
Personal Portfolio Website <i>HTML, CSS, JavaScript, Bootstrap</i>	mdahoma400.github.io
Responsive, mobile-first portfolio optimised for performance and accessibility.	

SKILLS

Data Engineering: ETL/ELT pipelines, data ingestion, dbt, medallion architecture, data quality, data modelling
Databricks & Big Data: Databricks notebooks and workflows, Databricks Apps, Delta Lake, Delta Live Tables, Auto Loader, Unity Catalog, Apache Spark, PySpark, Spark SQL
Programming Languages: Python, SQL, Java, JavaScript
Python Data Tools: pandas, NumPy, scikit-learn, Great Expectations
Databases: PostgreSQL, MySQL, SQLite
Backend & Applications: FastAPI, Django, Django REST Framework, REST API design, Dash
Tools & Platforms: Git, GitHub, Linux, Postman, VS Code
Spoken Languages: English (Fluent), French (Fluent), Arabic (Basic)

CERTIFICATIONS & ACHIEVEMENTS

Duolingo English Test Overall score 115 (CEFR B2)	Sep 2026
Introduction to Big Data Tools for Beginners Simplilearn SkillUp	Aug 2026
Android Lollipop: Android Animations Infosys Springboard	Jan 2026
Android Application Development Great Learning Academy	2026
Cyber Security and Privacy NPTEL, IIT Madras (Elite)	Jul – Oct 2025
2nd Place, Pick & Speak Competition National Youth Day, T. John College	2025
Java Programming; Introduction to Python Data Structures Great Learning Academy	2022
